

1. How many bands are available in a area? If someone has current use of a FM frequency in a area, will or why would they risk loosing this frequency to a LPFM?
 2. My wife and I listen to K-LOVE in Fairbanks because it is the only station available that offers the kind of music and programs that we like to listen to.
 3. If K-LOVE where to be displaced by a LPFM I know that a large group of people in the Fairbanks area would be without the music and programing that they like to listen to and wish their children to listen to.
 4. I believe that the programing provided by K-LOVE in my area is important to the community because the music is only good, uplifting, encouraging music, no music played has lyrics that degrade anybody, talk about doing drugs or beating up your wife/girlfriend, or what a rotten life I have, you know what I mean I hope.
